

Qualification of pumps and pumping equipment

Fluids and flow technologies

Effective test benches to optimize your pumping equipment

YOUR EXPECTATIONS

You are a pumping equipment manufacturer or user, and need to test your equipment at every step of your project:

- validation of a new design
- definition of hydraulic performance for an operating device
- contractual acceptance test

OUR SOLUTIONS

Cetim brings you the following services:

- study of a testing protocol according to a specific need
- execution of standardized or specifications-based tests, on test bench or on-site

Our facilities allow to realize incompressible fluid testings (10 m³/sec, 250 bar and 7.000 kW in water) as well as compressible fluid ones (50 bar et 15 kg/s in air)

YOUR BENEFITS

- our laboratory is accredited "Cofrac No. 1-0037 - Scope available on www.cofrac.fr" for pumps.
- our expertise in digital and experimental techniques and our unique in Europe testing resources are your best guarantee for reliable results
- you benefit from pluridisciplinary skills from our engineers and technicians to improve your products
