

Maintenance of fluid flow structures

Fluids and flow technologies

Our whole expertise for you to reduce operating costs (pumping...)

YOUR EXPECTATIONS

In order to define a predictive maintenance plan for your facility, you have to:

- define an equipment's hydraulic performance
- validate a new design
- perform a contractual acceptance test

OUR SOLUTIONS

- standard or specifications tests
- on-site and platform tests and qualifications
- study of testing protocols according to a specific need

We offer you a wide range of incompressible fluid test means (10 m³/sec, 250 bar and 7 000 kW in water) as well as for compressible fluid (50 bar and 15 kg/sec in air)

YOUR BENEFITS

- Cetim's unique in Europe for its testing resources
- You get the best expertise in digital and experimental techniques
- Accredited laboratory for pumps (Cofrac accreditation - No. 1-0037 - Scope available on www.cofrac.fr)
