

# METROLOGY ON 3D MEASURING MACHINE

**High-precision 3D measurement on every type of materials**

## Your expectations

You are looking for a service provider to:

- make 3D measurement on small or large series
- establish a measuring report to be used in appraisals

You want to be supported in:

- establishing your Quindos programmes
- mastering uncertainties on 3D-measuring machine
- making reverse engineering

## Our solutions

A metrology service (non-destructive testing) on efficient devices:

- a high-precision LEITZ 3D measuring machine, for a volume up to 2400x 1200x 1000 mm
- WERTH and TESA optical-3D measuring machine which is perfect to make quick and no-contact measuring (rigid elements)

Support services fitting your needs:

- mastering of 3D measurement
- handling of a reverse engineering project as a whole (design plan delivery)

## Your benefits

- Cetim's metrology experts guarantee the method used and best-time results
- our partnership with major laboratories and companies
- our technical center is equipped with many complementary measuring resources
