

METROLOGY FUNCTION AUDIT

**The best expert recommendations to help you
improve your metrology function**

Your expectations

- you want to define a strategy to optimize your calibration operations quality
- you want to assess your staff's skill in metrology
- you have to reduce your measuring devices calibration costs and down-times

Our solutions

Cetim experts analyze the way your metrology function is organized and works, in accordance with ISO9001 standard's requirements and your company's objectives. The following aspects are analyzed:

- human resources (profiles, responsibilities, training)
- facilities
- linking of measuring devices (internal, external, mix, measurement prototypes)
- management of measuring devices: (supplying, acceptance, periodic control, instructions and procedures, management, inventory, identification, reference, frequency)
- document and recording control

Recommendations will be indicated in a statement report.

Your benefits

Cetim's metrology experts:

- set up with you a reorganization plan in less than 2 weeks
- offer you to handle your whole project from analysis to pool management and staff training
