

MANAGEMENT OF SOIL CONTAMINATION AND DECONTAMINATION

Promote your real estate and respect your duties!

Your expectations

You want to:

- control your liabilities and financial challenges related to soil (de)contamination
- promote your real estate
- comply with the applicable regulation and meet administrative demands

Our solutions

- inquiries, analysis, monitoring and modelling to understand contamination
- implementation of methodological tools (IEM, PG, ARR) to identify risks and propose solutions according to your own challenges
- counselling, third-party expertise, project management support on the basis of a technical and economical analysis of alternative solutions to make the right choices
- training/action for the transfer of tools and methods adapted to your context.

Your benefits

- you benefit from a personalized follow-up to defend your interests from the beginning to the end of the application process
- find industrial solutions to be shared by all
- benefit from a third-party expertise to balance relationships with public authorities and contractors
- only one contact to deal with every aspect of the project (technical, legal, economical ones) from problem identification to solution.
