

CALL FOR EXHIBITORS AND SPONSORS

Following on from the great success of the 2012 and 2015 events, we can now announce that the next 3 day conference will be held on **18 to 20 April 2018 in Darmstadt, Germany.**

This event will be a forum for fan and system designers, manufacturers and operators, with the aim of improving our understanding of fans and their system interaction. The Fan 2018' conference will follow a format with three separate, but complimentary tracks: Fan Application and Systems, Fan Noise and Fan Aerodynamics.

BEING AN EXHIBITOR OR A SPONSOR

Your involvement with this event is an effective way to get into the minds of key decision-makers, helping you to capture your chosen audience when they are in the frame of mind to do business. Our flexible opportunities allow you to:

- Showcase new products
- Raise awareness of your operation
- Improve perception of your brand
- Influence other organizations' spending plans

The previous edition in 2015 has gathered 300 participants from more than 20 countries, about 2/3 from industry and 1/3 academics and 14 exhibitors.

The exhibition place will be situated close to the conference rooms. Coffee breaks and lunches will be served within this place. An opportunity will be given to each exhibitor to make a short presentation during the "exhibitors session" organized during the first day of the conference.

CONFERENCE SCOPE

This three-day conference will include keynote lectures and technical presentations. The technical presentations will be organized as three technical tracks, focusing on fan applications and systems, fan noise and fan aerodynamics. All types of fans, such as those used in industrial process, HVAC, electronic equipment, household appliances, automotive and traction fall within the scope of the conference.

THE THREE TRACKS OF THE CONFERENCE WILL BE:

Fan Applications and Systems

- Compliance with Legislation & Regulations
- Harmonization of Fan Standards Worldwide
- Operation and Maintenance Considerations
- Motors & Drives
- Specialized Fans for different applications
- Retrofit and Upgrading existing fan installations
- Fan System Effect
- Energy related topics (e.g. air curtain effectiveness)
- Case studies (e.g. tunnel ventilation)
- Improving Fan Sizing/Selection
- Fan Retrofits and Replacements for Efficiency
- Structural mechanical aspects
- Transient phenomena
- Lessons learnt
- Scaling methods
- Market surveillance

Fan noise

- Aerodynamic fan noise Generation Mechanisms
- Structure-borne noise
- Dynamic forces transmission
- Experimental Methods for characterizing noise sources
- Noise source localization
- Design for Low-Noise Fans
- Noise Prediction by analytical/numerical models
- Optimization of Fan Installation to Reduce Noise
- Psychoacoustics and sound quality

Fan Aerodynamics

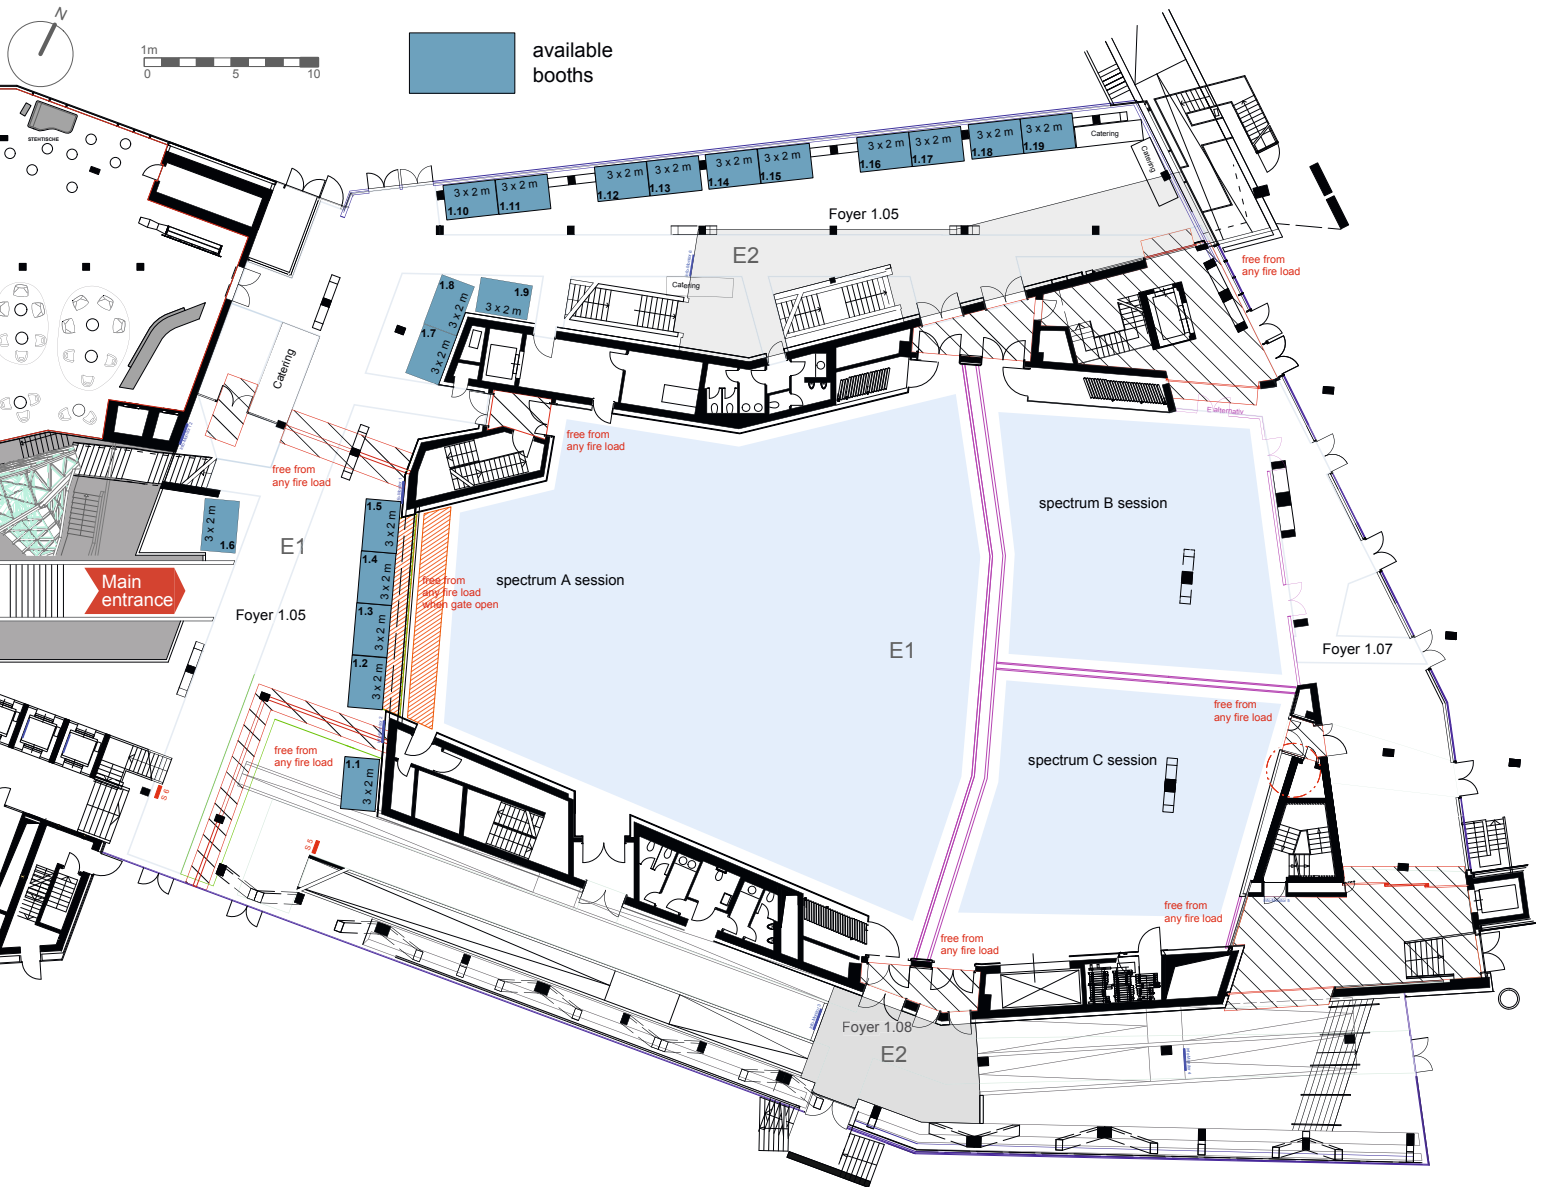

- Development of analytical and computational methods
- Validation and verification
- Application of analytical and computational methods for fan analysis, design and optimization
- Physics of aerodynamic losses
- Inverse Design
- Unsteady CFD simulations including LES and hybrid RANS/LES
- Fan Design for improved efficiency
- Impact of Emerging Technology on Fan Design
- Experimental methods in fan analysis and design
